

One of the main reasons I'm paid \$400 for my in-car XM radio, plus three years worth of service, was because I live three minutes from the interstate, and I don't have time to wait 20 minutes for the local stations to get around to my neighborhood...if they get to the traffic at all. XM's traffic and weather is 24/7, something the local stations are not, and is precise enough to cover the back roads I take. If the NAB wants to stop XM from taking over the localized traffic market, they should work harder to provide up-to-date traffic, not take away a service I am paying for. Please reject the NAB's petition 04-160; I love XM because they have the freedom to provide worthwhile and entertaining programming, and that's what I pay for. Don't stifle their freedom to broadcast what they want on a subscriber-based service.
